

Team 23- Bryce Melvin, Peter Wang, Emma Langdon, Aaron Aaeng  
Github Link: <https://github.com/brme2407/Project-Juice->

The results of planning allowed the team to generate a basic outline of the steps we as a group need to take within the next three to six weeks. The snapshot(s) detailing the requirements are below. Also after planning as a team we all learned that there is only four team members as opposed to six like everyone else, meaning we will have to work a bit more. We all gained a better understanding of what non-functional, functional, and user requirements are.
